INDEX-GAZETTEER

OF THE

PRINCIPAL TOWNS OF THE WORLD

The following Index Gazetteer includes the names of all places in the United States having a population of 500 and over, and of all eities in foreign countries having 10,000 or more inhabitants, with the exception of certain Asiatic eities omitted because reports respecting them are untrustworthy. Following the name of the place are the name of the county, country or other political division in which the place is situated, and the index-reference letter and number by means of which the location of the place is found on the map; the page of the Atlas where any desired map is printed may be found by referring to the prefatory Alphabetical List of Countries, States and Cities. Then follow data showing commercial, industrial educational and general characteristics of the place and the immediately surrounding country. At the end of the line is given the population of the city or village. Some comparatively unimportant places have been omitted from the maps to avoid crowding and consequent indistinctness in the engraving; such omitted towns will be found in the list, and their situation on the map, in each case, may readily be determined by means of the index-reference letters and numbers. and numbers

In the United States the county seats are designated by c.h., following the name of the place. The capital cities of various states and countries

In cities of the United States having 20,000 inhabitants or over, the three largest manufacturing industries, as reported by the Census for the year 1900, are specified in the order of their importance, determined by the total value of these products. In some instances, where the value of the products of these specified manufacturing industries is notably large, the total for the census year is given in parentheses, following the name of the industry. In foreign cities the leading industries are designated in accordance with the best authorities.

The population of each place in the United States is in accordance with the census of 1900; for places in other countries the latest official census or anthentic estimate has been used. The date of the latest official enumeration of the following countries is given as indicating the respective value of the figures used in the compilation: Algeria, 1901; Australia, 1901; Australia, 1900; Belgium, 1901; Bulgaria, 1900; Canada, 1901; Chile, 1902; Costa Rica, 1902; Cuba, 1899; Denmark, 1900; Egypt, 1897; England and Wales, 1901; Gold Coast, 1901; Greece, 1896; Guatemala, 1898; Guiana, British, 1903; Guiana, French, 1898; India, 1901; Ireland, 1901; Italy, 1901; Japan, 1898; Java, 1900; Mexico, 1900; Netherlands, 1899; Norway, 1900; Paraguay, 1899; Philippine Islands, 1903; Porto Rico, 1899; Portugal, 1900; Russia, 1897; Roumania, 1899; Salvador, 1901; Scotland, 1901; Spain, 1900; Sweden, 1902; Switzerland, 1900.
